Summary

Frontend Engineer with 8+ years of experience delivering high-quality web and hybrid applications using React.js, JavaScript, and modern development tooling. Adept at creating scalable, maintainable solutions for fintech, education, and mobility. Proven ability to work across multiple repositories and platforms, delivering cross-functional features with strong attention to performance and UX. Experienced in collaborating with multidisciplinary teams and driving frontend strategy for complex ecosystems.

Experience

Mercado Libre — Mercado Pago 2023 - 2025

Software Engineer Remote

- Led frontend development of React.js flows for Mercado Pago POS devices (datafónos), with interfaces deployed as embedded WebViews in Android using WebKit.
- Delivered production-ready features across **33+ repositories**, including Bluetooth pairing, amount authorization, user confirmation, and payment capture.
- Built dynamic, cross-platform UIs for real-time device communication using React.js and Mercado Pago APIs.
- Supported product expansion from Chile to Brazil and Argentina through localized UI/UX and platform adaptability.
- Created hardware-in-the-loop testing environments with QA and DevOps for robust validation.

Celerik 2022-2023

Middle Software Developer Remote

- Built a PM assistant chat interface using Microsoft Power Apps and PCF (PowerApps Component Framework) with custom React.js components.
- Contributed to Abacus financial app: created forms, implemented validations, integrated Axios for RESTful services.
- Delivered education-focused React.js and React Native features for a Texas-based museum application.
- Handled testing and debugging of a language learning mobile app.
- Developed public transport route interface for FlowOS using Redux and React.js.
- Led the UI development of Wallie App store platform using Next.js and Tailwind CSS.

Upwork -Freelancer 2020-2021

Frontend Developer Remote

- Built modular section components for a Landing Page Generator.
- Performed code reviews in GitHub and GitLab.
- Authored Storybook documentation for an open-source UI library.

OmniLatam 2019-2020

Jr. Frontend Developer Bogotá

- Developed Angular-based UI components integrated with backend APIs.
- Reviewed and optimized code quality; mentored new developers.
- Enhanced feature robustness through bug resolution and UI refinement.

Fundación Universitaria de Popayán 2018-2019

Full-stack Web Developer Popayán

- Built a desktop application for teachers using Electron and Node.js
- Developed and integrated custom API solutions for a Node.js backend
- Created smooth animations and transitions for an enhanced user experience with CSS and React
- Managed the development life cycle and collected requirements for product features

Appsus- Inventory Software 2017-2018

Front end Developer

- Developed a JavaScript-based Point-of-sales application for restaurants
- Created components using a proprietary JavaScript framework and React

Universidad Remington 2016-2017

Professor Popayán

- Taught Requirements Engineering Process, Application Architecture Planning, and Web Application Development

Education

Universidad del Cauca Bachelor's Degree

Electronic and Telecommunications Engineering

Skills

Languages & Frameworks:

avaScript (ES6+), React.js, Redux, Redux Toolkit, Next.js, React Native, Node.js

● ● ● ● ●

UI/Styling:

HTML5, CSS3, Sass, Less, Tailwind CSS, MUI, CSS-in-JS

● ● ● ● ●

Build & Tools:

Webpack, Babel, Vite, Git, GitHub, GitLab, Bitbucket, Azure DevOps, Gerrit

● ● ● ● ●

Testing:

Jest, React Testing Library, Storybook

● ● ● ● ●

Project Management:

Jira, Trello, AzureBoards • Agile (Scrum/Kanban)

● ● ● ● ●

Design & Prototyping:

Figma, Sketch

● ● ● ● ●

Other:

PCF (PowerApps), SSR, API integration (REST), Bluetooth/NFC POS integration, Performance profiling, Security best practices

● ● ● ● ●
